PROMOL

Beef

Urea-based high protein mineralised meal, suitable for use with cereal-based premixes or as part of a mixed ration alongside forage. Ideal for growing and finishing cattle over 12 weeks of age.

Features & benefits:

- An ideal urea-based protein meal supplement for use in cereal-based premixes to provide a high level of effective rumen degradable protein (ERDP) to improve diet utilisation.
- Contains sodium bicarbonate to help to support rumen function.
- Contains added copper, selenium, zinc, cobalt and iodine to support good stock health, as well as supplementing cereals and forages with major minerals plus vitamins A, D₃ and E.
- A non-GM product.
- Available with added Diamond V XPC, a unique fermentation product containing multiple functional compounds working together to support rumen health, daily liveweight gain and feed conversion efficiency.
- Available in 25kg pack size.

Ideal for:

- Home-mixing and premixes for cereal-fed cattle or those on low protein, forage-based diets.

User guide:

- Suitable for home mixes/premixes alongside cereals or as part of a mixed ration alongside low protein forages.
- Suitable for feeding to cattle from 12 weeks of age onwards.
- Do not feed to sheep.

Typical intakes:

- 4-8 bags per tonne inclusion with cereals.

Ready Reckoner:

Cereal inclusion %	90	85	80
Promol inclusion %	10	15	20
Bags/tonne	4	6	8
Overall ration CP %	14	15.5	17
